## Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 28, 2004 has been entered.

## Response to Amendment

2. Claims 1-10 have been cancelled. Claims 11-20 have been added.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 11-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cordery et al.(U.S.PAT. 5768132A).

Re claim 11: Cordery et al. disclose a method of mail preparation, including the steps of: processing a first mail item comprising a mail item in a series of mail items(col. 2, lines 20-40);

effecting an accounting operation in respect of a first postage charge for the first mail item, and generating a first postage indicium to provide evidence that the accounting operation has been effected in respect of the first postage charge(col. 4, lines 50-67);

processing a second mail item comprising a mail item, subsequent to the first mail item, in the series of mail items(col. 2, lines 20-40);

Application/Control Number: 10/087,797

Art Unit: 3628

determining whether the first postage charge remains unused because processing of the first mail item has not been completed(col. 2, lines 20-40);

where the first postage charge is unused, determining whether the first postage indicium is suitable for use in relation to the second mail item(col. 2, lines 20-40);

where the first postage indicium is suitable for use in relation to the second mail item, generating a postage indicium to provide evidence in relation to the second mail item that the accounting operation has been effected in respect of the first postage charge(col. 11, line 15-col. 12, line 45); and

where the first postage indicium is not suitable for use in relation to the second mail item, effecting an accounting operation in respect of a second postage charge for the second mail item, and generating a second postage indicum to provide evidence that the accounting operation has been effected in respect of the second postage charge(col. 2, lines 20-40, col. 4, lines 50-67).

Cordery et al. does not explicitly disclose substitute. However, the reference does refer to generating a replacement indicum in col. 12, lines 35-45. Thus, it would have been obvious to one with an ordinary level of skill in the art to employ a substitute or replacement indicum to get the benefit of completely using available indicum to ensure suitable postage affixed to the mail piece.

Re claim 12: Cordery et al. disclose wherein the substitute postage indicium is generated as a modification of the first postage indicium(col. 11, line 15-col. 12, line 45, i.e. reuse).

Re claim 13: Cordery et al. disclose wherein the step of generating a substitute postage indicium includes the step of providing an indicator in the first postage indicum indicative that the accounting operation for the first postage charge relates to the second mail item(col. 2, lines 20-40, col. 4, lines 50-67, col. 11, line 15-col. 12, line 45).

Re claim 14: Cordery et al. disclose wherein the substitute postage indicium includes a cryptographic token and the cryptographic token is based in part upon the indicator (col. 4, lines 50-67).

Re claim 15: Cordery et al. disclose wherein the first postage indicium is generated to include a flag in a first state, and the substitute postage indicium is generated with the flag in a second state different from the first state(col. 8, lines 1-40, col. 12, lines 55-67).

Re claim 16: Cordery et al. disclose wherein the substitute postage indicum includes a cryptographic token and the cryptographic token is based in part upon the state of the flag(col. 4, lines 50-67, col. 8, lines 1-40, col. 12, lines 55-67).

Application/Control Number: 10/087,797

Art Unit: 3628

Re claim 17: Cordery et al. disclose wherein the step of generating the first postage indicium is based at least in part on a recipient address, and the step of determining whether the first postage indicium is suitable for use in relation to the second mail item includes the step of determining whether the recipient address of the second mail item is the same as the recipient address of the first mail item(col. 3, lines 10-col. 4, line 10).

Re claim 18: Cordery et al. disclose further including the steps of storing the first postage indicium and a marker relating to the stored first postage indicium(col. 3, lines 10-35, lines 64-67); and setting the marker where processing of the first mail item is not completed (col. 12, lines 55-67, i.e. a flag is a marker).

Re claim 19: Cordery et al. disclose further including the step of resetting the marker relating to the stored first postage indicum where the first postage indicium is determined to be suitable for use in relation to the second mail item(col. 3, lines 10-35, line 64-col. 4, line 10,col. 12, lines 55-67, i.e. a flag is a marker).

Re claim 20: Cordery et al. disclose an accounting unit operable to effect an accounting operation in respect of postage charges for mail items in a series of frail items, and generate postage indicia to provide evidence that accounting operations have been effected in respect of the postage charges;

wherein the accounting unit is configured to:

effect an accounting operation in respect of a first postage charge for a first mail item in a series of mail items, and generate a first postage indicium to provide evidence that the accounting operation has been effected in respect of the first postage charge; and

in processing a second mail item comprising a mail item, subsequent to the first mail item, in the series of mail items, determine whether the first postage charge remains unused because processing of the first mail item has not been completed, and, where the first postage charge is unused, determine whether the first postage indicium is suitable for use in relation to the second mail item, and, where the first postage indicum is suitable for use in relation to the second mail item, generate a postage indicum to provide evidence in relation to the second mail item that an accounting operation has been effected in respect of the first postage charge, and, where the first postage indicum is not suitable for use in relation to the second mail item, effect an accounting operation in respect of a second postage charge for the second mail item, and generate a second postage indicum to provide evidence that an accounting operation has been effected in respect of the second postage charge(col. 2, lines 20-40, col. 4, lines 50-67, col. 11, line 15-col. 12, line 45).

Art Unit: 3628

Cordery et al. does not explicitly disclose substitute. However, the reference does refer to generating a replacement indicum in col. 12, lines 35-45. Thus, it would have been obvious to one with an ordinary level of skill in the art to employ a substitute or replacement indicum to get the benefit of completely using available indicum to ensure suitable postage affixed to the mail piece.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Debra F. Charles whose telephone number is (703) 305-4718. The examiner can normally be reached on 9-5 Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frantzy Poinvil can be reached on (703) 305-9779. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
